PART I: INTRODUCTION

1 Macroeconomics and the Real World	3
1.1 The Problems of Macroeconomics	3
1.2 What Is Macroeconomics?	4
1.2.1 Macroeconomics Defined	4
1.2.2 The Origins of Macroeconomics	5
1.2.3 Positive versus Normative Macroeconomics	6
1.3 Doing Macroeconomics	7
1.3.1 Macroeconomics as a Science	7
<i>Social Sciences versus Natural Sciences</i>	7
<i>Rational Behavior</i>	8
<i>Observation versus Controlled Experiments</i>	9
1.3.2 Models and Maps	10
<i>Models as Maps</i>	10
<i>Mathematical Models</i>	11
<i>The Uses of Models</i>	12
<i>The Scope of Models</i>	15
<i>Graphical or Diagrammatic Models</i>	15
1.4 Where Do We Go from Here?	18

PART II: THE NATIONAL ACCOUNTS

2 The National Accounts and the Structure of the Economy	29
2.1 How Big Is the Economy?	29
2.2 GDP and the Economic Process	30

2.2.1	Stocks and Flows	30
2.2.2	The Circular Flow	31
	<i>The Domestic Private Sector</i>	32
	<i>Investment Savings, Capital, and Time</i>	34
	<i>The Government Sector</i>	36
	<i>The Foreign Sector</i>	38
	<i>A Bird's-Eye View of the Economy</i>	39
2.3	The National Accounting Identities	40
2.3.1	The Production-Expenditure Identity	40
2.3.2	The Disposable-Income Identity	41
2.3.3	The Sectoral-Deficits Identity	42
2.3.4	The Inflow-Outflow Identity	45
	<i>Box 2.1. The Twin-Deficits Problem and the Sectoral-Deficits Identity</i>	46
2.4	Real Gross Domestic Product	47
2.4.1	Real and Nominal Quantities	47
2.4.2	Converting Nominal to Real GDP	49
2.4.3	International GDP Comparisons	52
2.4.4	Population and Real per Capita GDP	54
2.5	GDP through Time	56
2.5.1	Visualizing Growth 1: Growth Rates	56
2.5.2	Visualizing Growth 2: Logarithmic Graphs	57
2.6	Measuring Inflation	58
2.6.1	Inflation and Deflation	58
2.6.2	Measuring Inflation Using the GDP Deflator	60
2.7	Economic Behavior and the National Accounts: Aggregate Demand and Supply – A Prelude to Later Chapters	61
3	Understanding Gross Domestic Product	71
3.1	What Is a Final Product?	72
3.1.1	Quid Pro Quo	72
3.1.2	Final and Intermediate Products	72
3.1.3	Existing Goods	75
3.2	Product and Income	75
3.3	Domestic versus National Product	77
3.4	Depreciation and Net Product	78
3.5	Limits, Judgments, and Puzzles	80
3.5.1	Investment or Consumption?	80
3.5.2	Nonmarket Production	82
	<i>Home Production</i>	83
	<i>The Third-Party Test</i>	84
	<i>Owner-Occupied Housing</i>	84
	<i>Government Services</i>	85

3.5.3	The Black Economy	86
3.5.4	Bads and Regrettables	88
3.5.5	GDP and Welfare	89
3.6	Measuring GDP	91
3.6.1	Sources and Methods	91
3.6.2	Revisions	95
3.6.3	Annualization and Seasonal Adjustment	98
3.7	Putting It All Together: Reading the NIPAs	99
3.7.1	The National-Income-and-Product Account	100
3.7.2	The Personal-Income-and-Outlay Account	102
3.7.3	Three Sectors, Three Deficits	104
4	Measuring Prices and Inflation	114
4.1	Constructing Price Indices	115
4.1.1	The Laspeyres (or Base-Weighted) Index	115
4.1.2	The Paasche (or Current-Weighted) Index	118
4.1.3	The Fisher-Ideal Index	119
4.1.4	The Chain-Weighted Index	119
4.1.5	Price Indices and Real GDP	120
4.1.6	The Implicit Price Deflator	122
4.2	Alternative Price Indices	123
4.2.1	The Consumer Price Index (CPI)	123
4.2.2	The Personal Consumption Expenditure Deflator	125
4.2.3	The Producer Price Index (PPI)	125
4.3	Core Inflation	128
4.3.1	The Core Rate of Inflation	128
4.3.2	The Weighted-Median CPI	129
 PART III: TRENDS AND CYCLES		
5	Trends and Cycles	139
5.1	Decomposing Time Series	139
5.2	The Business Cycle	142
5.2.1	The Language of Business Cycles	142
5.2.2	Dating the Business Cycle	144
5.2.3	The Typical Business Cycle	145
5.3	The Business Cycle and the Economy	152
5.3.1	What Causes the Business Cycle?	152
5.3.2	The Classification of Economic Indicators	154
5.3.3	Is the Business Cycle Predictable?	155
 PART IV: FINANCIAL MARKETS		
6	The Financial System	167
6.1	The Financial System and the Real Economy	167

6.1.1	The Role of Money and Finance	167
	<i>Real Flows and Financial Flows</i>	168
	<i>The Monetary Economy</i>	169
	<i>Financial Instruments and Financial Intermediaries</i>	170
	<i>The Flow of Funds</i>	172
6.1.2	The Flow of Funds Accounts	174
	<i>Real and Financial Wealth</i>	175
	<i>Accounting and Balance Sheets</i>	176
	<i>Flow Accounts</i>	177
	<i>The Assets-and-Liabilities Accounts</i>	181
6.2	Principles of Valuation	183
6.2.1	Present Value	184
	<i>The Principle of Similarity and Replacement</i>	184
	<i>Two Key Concepts: Opportunity Cost and Present Value</i>	185
	<i>Four Properties of Present Value</i>	187
6.2.2	Real and Nominal Value	187
	<i>A Useful Approximation</i>	189
	<i>The Ex Ante versus the Ex Post Real Rate</i>	189
6.3	The Main Financial Instruments	190
6.3.1	Debt	190
	<i>What Are Bonds?</i>	191
	<i>The Mechanics of Bond Pricing</i>	192
	<i>Types of Bonds</i>	194
	<i>Prices and Yields</i>	195
6.3.2	Money	197
6.3.3	Equity	199
	<i>What Are Stocks?</i>	199
	<i>The Mechanics of Stock Pricing</i>	200
	<i>Stock Prices and Yields</i>	201
	<i>Stock Market Indices</i>	204
6.4	Financial Markets and Aggregate Demand	205
7	The Behavior of Interest Rates	214
7.1	Five Questions about Interest Rates	214
7.2	The Market for Financial Assets	216
7.2.1	Substitution and Arbitrage	216
	<i>Similarity and Replacement Again</i>	216
	<i>Supply and Demand</i>	217
	<i>Reaching Equilibrium in a Financial Market</i>	217
	<i>Arbitrage</i>	220
7.2.2	Efficient Markets	220
	<i>Inside and Outside Views of Financial Markets</i>	220
	<i>The Efficient-Markets Hypothesis</i>	221

<i>Challenges to the Efficient-Markets Hypothesis</i>	222
<i>Two Answers</i>	224
7.3 Risk	224
7.3.1 Default Risk	224
<i>Risk and Return</i>	224
<i>Federal Government Bonds</i>	225
<i>Rating Risk</i>	226
<i>Default Risk and Interest Rates</i>	228
7.3.2 Price or Interest-Rate Risk	229
7.4 The Term Structure of Interest Rates	230
7.4.1 The Relationship of Interest Rates of Different Maturities	230
7.4.2 The Expectations Theory of the Term Structure	232
<i>Arbitrage across Different Maturities</i>	232
<i>Expectations and the Shape of the Yield Curve</i>	234
<i>Alternative Portfolio Strategies</i>	236
<i>Implicit Expectations</i>	237
7.4.3 The Role of Risk	238
7.5 Inflation and Interest Rates	239
7.5.1 The Effect of Inflation on the Supply and Demand for Bonds	239
7.5.2 The Fisher Effect and the Fisher Hypothesis	241
<i>Box 7.1. Measuring Expected Inflation</i>	244
7.6 The Level of Real Interest Rates	247
7.6.1 Monetary Policy and Short Rates	247
7.6.2 Arbitrage to Real Returns	248
7.7 The Five Questions about Interest Rates Revisited	249
Appendix: The LM Curve	250
7.A.1 Money Supply and Money Demand	251
<i>The Real Supply of Money</i>	251
<i>Transactions Demand for Money</i>	251
<i>Money Demand and Interest Rates</i>	251
<i>The Money Demand and Supply Curves</i>	252
7.A.2 The LM Curve	253
<i>Deriving the LM Curve</i>	253
<i>What Shifts the LM Curve?</i>	254
<i>What Use Is the LM Curve?</i>	255
7.A.3 The Limitations of the LM Model	256
8 The International Financial System and the Balance of Payments	264
8.1 The Global Economy	264
8.2 Balance-of-Payments Basics	269
8.2.1 The Current Account	269

8.2.2	The Capital Account	270
8.2.3	The Balance-of-Payments Identities	273
8.3	Exchange-Rate Basics	275
8.3.1	Exchange Rates as the Relative Price of Money	275
	<i>The Price of One Currency in Terms of Another</i>	275
	<i>Appreciation and Depreciation</i>	276
8.3.2	The Real Exchange Rate	277
	<i>The Real Price of a Foreign Good</i>	277
	<i>Purchasing Power and Price Indices</i>	278
8.3.3	Effective Exchange Rates	279
8.4	The Foreign Exchange and Financial Markets	281
8.4.1	The Foreign-Exchange Market	281
	<i>Foreign Exchange and Real Trade</i>	281
	<i>Foreign Exchange and Financial Trade</i>	282
	<i>Direct and Indirect Exchange</i>	283
8.4.2	Exchange Rates and Relative Prices	285
	<i>The Law of One Price</i>	285
	<i>Purchasing-Power Parity</i>	287
	<i>The Mutual Adjustment of Prices and Exchange Rates</i>	288
	<i>How Well Does Purchasing-Power Parity Work in Practice?</i>	290
8.4.3	Exchange Rates and Interest Rates	292
	<i>The Exchange Rate, Capital Flows, and Interest Parity</i>	292
	<i>Uncovered Interest Parity</i>	294
	<i>Exchange-Rate Risk</i>	295
	<i>Interest-Rate Differentials and Short-Run Deviations from Purchasing-Power Parity</i>	296
	<i>Interest Parity in Practice</i>	297
	<i>The Limits of Short-Run Exchange Rate Models</i>	299
 PART V: AGGREGATE SUPPLY		
9	Aggregate Production	309
9.1	The Production Decisions of Firms	310
9.1.1	Production Possibilities	310
	<i>Technology</i>	310
	<i>The Production Function</i>	311
	<i>Measurement Issues</i>	313
	<i>Basic Properties of the Production Function</i>	314
	<i>Returns to Scale</i>	316
9.1.2	Optimal Production	318
	<i>Profit Maximization</i>	318

<i>Marginal Products and Factor Prices</i>	320
<i>Choosing Input Levels</i>	324
9.2 Aggregate Supply	326
9.2.1 The Aggregate Production Function	326
9.2.2 The Cobb-Douglas Production Function	327
9.2.3 Does the Cobb-Douglas Production Function Provide a Good Model of Aggregate Supply?	328
<i>The Cobb-Douglas Production Function Predicts Constant Factor Shares</i>	328
<i>Are Factor Shares Constant?</i>	329
9.2.4 A Cobb-Douglas Production Function for the United States	331
9.3 Productivity	331
9.3.1 Alternative Measures of Productivity	332
<i>Three Measures</i>	332
<i>International Comparisons</i>	333
<i>How Are the Productivity Measures Related?</i>	334
9.3.2 Technological Progress	337
<i>Factor Productivity over Time</i>	337
<i>Factor-Augmenting Technological Progress</i>	338
9.4 Short-Run and Long-Run Aggregate Supply	339
9.4.1 Flexible and Inflexible Production Functions	339
9.4.2 Productivity and Resource Use in the Short Run	341
9.4.3 Measures of Resource Use	343
<i>Labor Utilization</i>	343
<i>Capital Utilization</i>	343
9.5 Potential Output	345
9.5.1 The Concept of Economic Potential	345
9.5.2 Scaled Output	345
9.6 Aggregate Supply: Questions Answered, Questions Raised	347
10 Economic Growth	353
10.1 Why Growth Is Important	353
10.2 Accounting for Growth	357
10.2.1 Production at a Point in Time and Production over Time	357
10.2.2 Decomposing Economic Growth	358
10.2.3 Accounting for Growth Rates	362
10.3 The Sources of Economic Growth	363
10.3.1 Productivity and Technological Progress	364
<i>Product Innovation</i>	364
<i>Process Innovation</i>	365
<i>Research and Development</i>	366

10.3.2	The Growth of Labor	367
	<i>The Law of Motion of Labor</i>	367
	<i>Malthusianism</i>	368
	<i>Economic Development and the Stabilization of Population</i>	369
10.3.3	The Growth of Capital	371
10.4	The Neoclassical Growth Model	372
10.4.1	The Process of Growth	373

PART IX: MACROECONOMIC DATA

A Guide to Working with Economic Data	727
G.1 Economic Data	727
G.1.1 Variables	727
G.1.2 The Dimensions of Data	729
<i>Keeping Track of Units</i>	729
<i>Stocks and Flows</i>	729
<i>Annualization and Aggregation</i>	730
<i>Percentages and Percentage Points</i>	730
G.1.3 Seasonal Adjustment	731
G.2 Graphs	732
G.2.1 Cross-Sectional Graphs	732
<i>Univariate Cross-Sectional Graphs</i>	732
<i>Multivariate Cross-Sectional Graphs</i>	733
G.2.2 Time-Series Graphs	733
<i>Time-Series Plots</i>	733
<i>Time-Series Scatterplots</i>	735
G.2.3 Guide to Good Graphics	735
<i>A Good Graph Is Informationally Rich</i>	735
<i>A Good Graph Is Clear and Self-Contained</i>	736
<i>A Good Graph Is Aesthetically Pleasing</i>	736
<i>The Golden Rule of Graphics</i>	737
G.3 A Guide to Good Tables	737
G.4 Descriptive Statistics	738
G.4.1 Histograms and Frequency Distributions	738
G.4.2 Measures of Central Tendency	740
<i>The (Arithmetic) Mean</i>	740
<i>The Weighted Mean</i>	741
<i>The Median</i>	741
<i>The Geometric Mean</i>	743
G.4.3 Measures of Variation	744
<i>Variance</i>	744
<i>Standard Deviation</i>	746
<i>Coefficient of Variation</i>	747
G.5 Making Inferences from Descriptive Statistics	747
G.5.1 Homogeneity	747
G.5.2 Stationarity	749
G.6 The Normal Distribution	751
G.7 Type I and Type II Error	752
G.8 Using Index Numbers	754
G.8.1 Index Numbers	754

G.8.2	Price Indices	756
	<i>Laspeyres (or Base-Weighted) Index</i>	756
	<i>Paasche (or Current-Weighted) Index</i>	757
	<i>The Fisher-Ideal Index</i>	758
G.9	Real and Nominal Magnitudes	759
G.9.1	Conversions between Real and Nominal Magnitudes	759
	<i>Converting Nominal Data to Real</i>	759
	<i>Converting Real Data to Nominal</i>	760
	<i>Converting Real Data of One Reference Period to That of Another Period</i>	760
G.9.2	Real Values Using Chain-Weighted Indices	761
